

## Course Information Sheet for entry in 2025-26: DPhil in Oncology

### Course facts

Mode of study	Full Time Only
Expected length	3 to 4 years

### About the course

This programme aims to train the next generation of leaders in translational oncology research by applying state-of-the-art techniques to address fundamental biology of cancer and how to optimise treatments for patients.

The Department of Oncology employs multidisciplinary approaches from physics, biology, chemistry and mathematical modelling to investigate DNA biology and epigenetics, cell and environmental biology of tumour tissue and both systemic and local immunological responses in cancer. This programme focuses on expanding scientific knowledge with a particular focus on therapies involving drug discovery or action and combination therapies with radiotherapy.

The DPhil in Oncology is a three-to-four year DPhil programme and is based on the conduct of a specific research project conducted in a single research group or laboratory. Applications are accepted from both basic scientists and clinicians.

Students will be admitted directly to a particular research area, within a research group/laboratory lead by a Principal Investigator who will be formally appointed as their DPhil supervisor.

As a graduate student you will have access to a wide range of resources offered by the department, the Medical Sciences Division and the wider University, to obtain the skills you need to become an outstanding researcher. The Department of Oncology provides an induction to the department in the first weeks of study and encourages attendance at divisional and University induction events. There is also a wide range of courses and workshops which you can attend to acquire skills that will be necessary for the pursuance and presentation of your research, as well as your professional development as a research scientist. Please note there are no taught elements for the DPhil in Oncology.

You will be encouraged to attend training opportunities that include both subject-specific and generic research and transferable skills.

### Attendance

The course is full-time and requires attendance in Oxford. Full-time students are subject to the University's Residence requirements.

Provision exists for students on some courses to undertake their research in a 'well-founded laboratory' outside of the University. This may require travel to and attendance at a site that is not located in Oxford. Where known, existing collaborations will be outlined on this page. Please read the course information carefully, including the additional information about course fees and costs.

### Resources to support your study

As a graduate student, you will have access to the University's wide range of world-class resources including libraries, museums, galleries, digital resources and IT services.

The Bodleian Libraries is the largest library system in the UK. It includes the main Bodleian Library and libraries across Oxford, including major research libraries and faculty, department and institute libraries. Together, the Libraries hold more than 13 million printed items, provide access to e-journals, and contain outstanding special collections including rare books and manuscripts, classical papyri, maps, music, art and printed ephemera.

The University's IT Services is available to all students to support with core university IT systems and tools, as well as many other services and facilities. IT Services also offers a range of IT learning courses for students, to support with learning and research.

You will be provided with laboratory workspace, desk space and IT facilities in support of your research. In addition there are on-site library and social facilities.

### Supervision

For this course, the allocation of graduate supervision is the responsibility of the Department of Oncology and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Department of Oncology.

Students will normally have two strands of supervision and the support of the Director of Graduate Studies, as well as administrative support within the department. Information about research groups and supervisors connected with this course can also be found on the Department of Oncology website.

The University has a code of practice for supervision of research under which supervisors must:

- Advise, guide and support the student in all aspects of their research project
- Identify a clear plan of research
- Draw up a timetable for research
- Have meetings, at a minimum once every two weeks
- Report on the student's progress
- Identify the student's training needs
- Encourage the student to participate in the wider Oxford community

In the case of students who require specific help to adjust to an academic programme or to a new range of skills, the supervisor will work with them to ensure they have additional support.

### **Assessment**

All students are initially admitted to the status of Probationer Research Student (PRS). Within a maximum of four terms candidates are expected to apply for transfer of status from Probationer Research Student to DPhil status.

A successful transfer of status assessment will require satisfactory attendance, submission of a thesis outline and presentation to the assessors. Students who are successful at transfer will then be expected to apply for and gain confirmation of DPhil status within nine terms of admission, to show that their work continues to be on track.

Both milestones normally involve a presentation and an interview with two assessors.

Students are expected to submit their thesis by the twelfth term of their studies. To be successfully awarded a DPhil candidates are required to attend a viva voce to defend their thesis to two appointed examiners, of which one is from the University and one is external from another institution.

### **Changes to this course**

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after you commence your course. These might include significant changes made necessary by any pandemic, epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

## Costs

### Annual fees for entry in 2025-26

Fee status	Annual Course fees
Home	£10,070
Overseas	£33,370

### Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2025-26 is £672, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600. Please contact your college for more details, including information about whether your college's continuation charge is applied at a different rate for part-time study.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees and any additional course-specific costs, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for the 2025-26 academic year are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

### Likely living costs for one month

	Lower range	Upper range
<b>Food</b>	£330	£515
<b>Accommodation</b>	£790	£955
<b>Personal items</b>	£200	£335
<b>Social activities</b>	£45	£100
<b>Study costs</b>	£40	£90
<b>Other</b>	£20	£40
<b>Total</b>	£1,425	£2,035

### Likely living costs for nine months

	Lower range	Upper range
<b>Food</b>	£2,970	£4,635
<b>Accommodation</b>	£7,110	£8,595
<b>Personal items</b>	£1,800	£3,015
<b>Social activities</b>	£405	£900
<b>Study costs</b>	£360	£810
<b>Other</b>	£180	£360
<b>Total</b>	£12,825	£18,315

### Likely living costs for twelve months

	Lower range	Upper range
<b>Food</b>	£3,960	£6,180
<b>Accommodation</b>	£9,480	£11,460
<b>Personal items</b>	£2,400	£4,020
<b>Social activities</b>	£540	£1,200
<b>Study costs</b>	£480	£1,080
<b>Other</b>	£240	£480
<b>Total</b>	£17,100	£24,420

When planning your finances for any future years of study at Oxford beyond the 2025-26 academic year, it is suggested that you allow for potential increases in living expenses of 4% each year – although this rate may vary depending on the national economic situation.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).

## Document accessibility

If you require a more accessible version of this document please contact Graduate Admissions and Recruitment by email ([graduate.admissions@admin.ox.ac.uk](mailto:graduate.admissions@admin.ox.ac.uk)) or via the online form (<http://www.graduate.ox.ac.uk/ask/form>).
