

## Course Information Sheet for entry in 2025-26: DPhil in Clinical Medicine

### Course facts

Mode of study	Full Time	Part Time
Expected length	3-4 years	6-8 years

### About the course

As a DPhil in Clinical Medicine student, you will conduct research in basic science and/or in clinical medicine. The degree will provide you with research skills, in-depth knowledge, understanding and expertise in your chosen field of research.

Research subjects cover a broad spectrum of sciences related to medicine and include: behavioural science, bioinformatics & statistics (including modelling and computational biology), cell and molecular biology, clinical epidemiology, drug discovery, genetics and genomics, global health and tropical medicine, immunology, integrative physiology (systems biology), microbiology, protein science and structural biology, and transcription biology.

Doctoral students within the Nuffield Department of Medicine carry out research in a single laboratory and there is no period of rotation between laboratories. All doctoral students develop their skills through a range of research training and skills development in their first year of full-time study or first two years of part-time study, by attending compulsory and optional training in laboratory techniques and generic skills, including scientific writing and statistics, while also working at the bench.

You will have access to, and be encouraged to attend, the lectures and seminars that individual research groups or groups with common areas of interest organise for their own members and others. This will depend on the specific unit/area within which you are housed. Medical Grand Rounds are also held in the graduate centre at the John Radcliffe Hospital. You will have access to the other departmental seminars announced via email.

You will also have access to doctoral training and research methods provision available across the Medical Sciences Division. The aim is to tailor this training to individual needs and bring all students up to satisfactory level in background knowledge. Later training is focused on the skills required for a successful career in independent research.

You may be required to attend fieldwork / laboratory / training sessions on dates to be determined by mutual agreement with your supervisor.

### Research groups

The Nuffield Department of Medicine (NDM) comprises research groups in several institutes and laboratories, including:

- Experimental Medicine Division
  - Translational Gastroenterology Unit
  - The Peter Medawar Building
  - Modernising Medical Microbiology
- NDM Research Building
  - Big Data Institute - NDM (BDI)
  - The Target Discovery Institute (TDI)
  - Centre for Translational Immunology
- Old Road Campus Research Building
  - Jenner institute
  - Ludwig Institute for Cancer Research
  - Centre for Medicines Discovery (CMD)
  - Pandemic Sciences institute (PSI)
- Centre for Tropical Medicine and Global Health
  - Mahidol Oxford Tropical Medicine Research Unit (MORU) - Thailand
  - Oxford University Clinical Research Unit (OUCRU) - Vietnam
  - Oxford Centre for Global Health Research (OCGHR) - Oxford
  - KEMRI–Wellcome Trust Collaborative Research Programme – Kenya
- Centre for Human Genetics (CHG)

- Division of Structural Biology (STRUBI)
- Chinese Academy of Medical Sciences Oxford Institute (CAMS COI)
- Oxford Particle Imaging Centre (OPIC)
- Oxford Protein Production Facility (OPPF)
- Centre for Cellular and Molecular Physiology (CCMP)

Students housed within the NDM-BDI can describe their DPhil subject as Biomedical Data Science. Those within Tropical Medicine and associated within the Africa and Asia Programmes (MORU, OUCRU and KEMRI) can describe their DPhil subject as Tropical Medicine and Global Health.

In exceptional cases, students may be admitted to study for the MSc by Research degree.

## Attendance

This course can be studied on a full-time or part-time basis. The full-time course is usually studied over three to four years. The part-time course is usually studied over six to eight years. If you are studying part-time, you will have the opportunity to tailor your study in liaison with your supervisor and agree your pattern of attendance.

Provision exists for students on some courses to undertake their research in a 'well-founded laboratory' outside of the University. This may require travel to and attendance at a site that is not located in Oxford. Where known, existing collaborations will be outlined on this page. Please read the course information carefully, including the additional information about course fees and costs.

Students on this course are part of the Medical Sciences Division; lectures and seminars cut across departments and collaborations are widespread within the University. You will be based in various units, building and campuses around Oxford, as well as in Tropical Medicine Units abroad. A list of units can be found under the *Research groups* heading above (units are located in Oxford, unless stated otherwise).

Full-time students who aren't based at a Tropical Medicine Unit are subject to the University's Residence requirements. Part-time students who aren't based at a Tropical Medicine Unit are required to attend in Oxford for a minimum of 30 days each year. This time will be spent attending supervision meetings, skills training and other obligations.

## Resources to support your study

As a graduate student, you will have access to the University's wide range of world-class resources including libraries, museums, galleries, digital resources and IT services.

The Bodleian Libraries is the largest library system in the UK. It includes the main Bodleian Library and libraries across Oxford, including major research libraries and faculty, department and institute libraries. Together, the Libraries hold more than 13 million printed items, provide access to e-journals, and contain outstanding special collections including rare books and manuscripts, classical papyri, maps, music, art and printed ephemera.

The University's IT Services is available to all students to support with core university IT systems and tools, as well as many other services and facilities. IT Services also offers a range of IT learning courses for students, to support with learning and research.

You will have access to the department's IT support, University Library services such as the Radcliffe Science Library and the Cairns Library, and experimental facilities are available as appropriate to the research topic. The provision of other resources specific to your project should be agreed with your supervisor as a part of the planning stages of the agreed project. There are a number of workshops that are announced via email and posters throughout the year.

Workspace will be allocated according to individual circumstances. If undertaking experimental work, you will be provided with bench space in a laboratory. If undertaking theoretical research, you will have shared office space.

## Supervision

The NDM takes the creation of supervisory teams very seriously and this will form an important part of the admissions process. All students must have at least two supervisors and many will have more than two. Within the NDM, students should meet with their supervisors at least once a fortnight, on average, across a year.

Please note that the allocation of graduate supervision for this course is the responsibility of the Nuffield Department of Medicine and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Nuffield Department of Medicine.

## Assessment

DPhil students must pass two milestone assessments during their research career:

1. Transfer of status - this must take place by the end of the fourth term (or eighth term for part-time students). Students submit a written transfer report and are interviewed by two assessors.
2. Confirmation of status - this must take place by the end of the ninth term (or eighteenth term for part-time students). Students submit a detailed thesis contents list and timetable for completion and are interviewed by two assessors.

Students are expected to submit their thesis within three to four years of admission to the DPhil. A viva (oral examination) is then conducted, normally within three months of submission.

### **Changes to this course**

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after you commence your course. These might include significant changes made necessary by any pandemic, epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

## Costs

### Annual fees for entry in 2025-26

#### Full-time study

Fee status	Annual Course fees
Home	£10,070
Overseas	£33,370

#### Part-time study

Fee status	Annual Course fees
Home	£5,035
Overseas	£16,685

### Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2025-26 is £672, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600. Please contact your college for more details, including information about whether your college's continuation charge is applied at a different rate for part-time study.

### Additional cost information

#### Full-time study

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

#### Part-time study

Please note that you are required to attend in Oxford for a minimum of 30 days each year, and you may incur additional travel and accommodation expenses for this. Also, depending on your choice of research topic and the research required to complete it, you may incur further additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees and any additional course-specific costs, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for the 2025-26 academic year are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

### Likely living costs for one month

	Lower range	Upper range
<b>Food</b>	£330	£515
<b>Accommodation</b>	£790	£955
<b>Personal items</b>	£200	£335
<b>Social activities</b>	£45	£100
<b>Study costs</b>	£40	£90
<b>Other</b>	£20	£40
<b>Total</b>	£1,425	£2,035

### Likely living costs for nine months

	Lower range	Upper range
<b>Food</b>	£2,970	£4,635
<b>Accommodation</b>	£7,110	£8,595
<b>Personal items</b>	£1,800	£3,015
<b>Social activities</b>	£405	£900
<b>Study costs</b>	£360	£810
<b>Other</b>	£180	£360
<b>Total</b>	£12,825	£18,315

### Likely living costs for twelve months

	Lower range	Upper range
<b>Food</b>	£3,960	£6,180
<b>Accommodation</b>	£9,480	£11,460
<b>Personal items</b>	£2,400	£4,020
<b>Social activities</b>	£540	£1,200
<b>Study costs</b>	£480	£1,080
<b>Other</b>	£240	£480
<b>Total</b>	£17,100	£24,420

When planning your finances for any future years of study at Oxford beyond the 2025-26 academic year, it is suggested that you allow for potential increases in living expenses of 4% each year – although this rate may vary depending on the national economic situation.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).

## Document accessibility

If you require a more accessible version of this document please contact Graduate Admissions and Recruitment by email ([graduate.admissions@admin.ox.ac.uk](mailto:graduate.admissions@admin.ox.ac.uk)) or via the online form (<http://www.graduate.ox.ac.uk/ask/form>).
